Minuendo®
Lossless earplugs

minuendo®

Professional musicians are almost four times as likely to develop noise-induced hearing loss (NIHL) as the general public.

Minuendo Music is an advanced pair of earplugs that provide natural sound in a wide protective range of sound levels. By manually adjusting the lever, the earplugs can decrease the level by 7 to 25dB while keeping the sound clear. With patented membrane technology and micrometer precision craftsmanship, there is no frequency degradation like the muffled sound of existing foam earplugs. The acoustic earplugs come with a range of ear tips in different materials and varying sizes to ensure both comfort and the prevention of sound leakage.

- Stepless adjustment (7-25dB)
- The world's only variable passive Hi-Fi filter
- Natural flat frequency response
- Patented acoustic membrane
- Unmatched comfort
- No electronics or batteries

Content list

- One pair of earplugs
- Carrying case
- 11 Sets of ear tips (S, M, L)
- Cleaning brush
- Neck leash
- User guide
